Full Stack Developer

I create innovative and efficient digital experiences using modern .NET and Frontend technologies.

Relevant Experience

Backend Developer - Kabeli - March 2024 – Present

As a Senior Backend .NET Developer, I have designed and developed scalable microservices using .NET Framework 4.8, this significantly improved system performance and improving deployment efficiency through the implementation of CI/CD pipelines. I use advanced tools like Azure Repos for version control and Jira for task management.

Full Stack .NET Developer - Globe - Jun 2023 - Feb 2024

I developed and implemented microservices using Domain-Driven Design (DDD) architecture with .NET Core 7, improving system scalability. I worked with SQL, PostgreSQL, and MySQL databases, ensuring optimal performance. I used collaboration tools like Bitbucket and Zoho Projects for project management.

Full Stack .NET Developer - UAI - Jan 2020 - Apr 2023

I contributed to the development and maintenance for academic management systems (Omega) using .NET Framework, React, and SQL Server. I designed and implemented complex business logic based on customized client requirements under agile (Scrum) and waterfall methodologies. I enhanced user experience by creating modern and efficient interfaces that optimized the use of academic systems.

Full stack Developer - AFP Cuprum - Jan 2018 - Nov 2019

I developed and supported client-oriented intranet systems, optimizing solutions with Oracle 11g and SQL Server 2008. I implemented improvements ensuring deliverable quality and meeting objectives by following agile Scrum methodologies.

Backend .NET Developer - Neoris - Aug 2015 - Dec 2016

I implemented integrations for the bank's internal systems using Oracle 11g and SQL Server 2008. I developed robust backend solutions while gaining experience with Santander's "Isban" methodology, focusing on system stability and performance.

Backend .NET Developer - Dimensión - 2015 - 2016

I was part of a support and development team for an application related to the "Factoring and Confirming" business, gathering requirements and adapting solutions to meet specific client needs in Bogotá, Colombia. Recognized for efficiently implementing integrations that optimized the bank's internal processes.

Skills

Programming Languages

C#, VB, JavaScript, TypeScript, HTML, CSS, T-SQL, PL-SQL.

Libraries & Frameworks

.NET Core, .NET Framework
React, JQuery, Bootstrap, Alakran.

Tools & Platforms

Git, GitHub, Webpack, Bitbucket, Gitlab. Visual Studio, Sql Server, Postman.

Practices

CI/CD, Agile/Scrum, DDD, Clean Architecture.

Selected Projects

My Account App

My Account App is an intuitive platform designed to simplify the management and supervision of personal finances in a clear and efficient way.

Education

System Analyst Degree

equivalent to a Bachelor's in
Information Technology
Simón Bolívar Institute – 2014 (Chile)

Interests

Family time, video games, playing guitar, cinema, going out for a good coffee, friends.
